

42  
each transmitted signal, and thereafter, they are, successively,  
short time and long time integrated to achieve detection.--

REMARKS

Applicant thanks the Examiner for calling to his attention the failure to note the May 17 reply to the PTO and trusts that the language of the cross reference is acceptable.

Further, as required, the applicant has expanded the language of the abstract to include the sequence of pertinent functions and structure disclosed. If there still remains a question, the applicant would appreciate very much a telephone call from the Examiner.

Respectfully submitted,

By C. A. Phillips
